## CANDIDATE'S DECLARATION

I, Kshitij Yadav, do hereby declare that the internship report titled “A Report on Data Analytics and AI-Assisted Research Internship at InAmigos Foundation: NGO Mapping, Social-Impact Analysis, and Community Outreach” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in Computer Science and Engineering. All the references have been quoted and I have not taken as such any material from any other source. I affirm that this report is my own and has not been submitted to any other institute for any degree/diploma requirement, and I shall be solely responsible for any kind of copyright violation in this regard.

Roll No.: 25SCS1003000889

## ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout my internship at InAmigos Foundation. I am thankful for their aspiring guidance, invaluable constructive criticism, and friendly advice extended to me during this work. I am sincerely grateful to the team at InAmigos Foundation for the opportunity to work on research-driven, socially meaningful assignments and for sharing their insight on the NGO and social-impact sector.

I would also like to thank the School of Computer Science and Engineering, IILM University, Greater Noida, for encouraging students to pursue practical, industry-linked internship experiences alongside their academic curriculum.

Finally, I express my gratitude to my parents and family for their constant support and blessings.

## INTERNSHIP CERTIFICATE

All task-based deliverables (Tasks 1–4, detailed in Section 4) and the optional fundraising activity were completed and formally acknowledged by InAmigos Foundation, as evidenced by the organisation's internal communication reproduced in Fig. 4.10.8 (Section 4.10). Following the standard post-internship processing period, InAmigos Foundation issued the signed Internship Completion Certificate, a Letter of Recommendation, and a Certificate of Appreciation, all dated 06 September 2026, formally confirming successful completion of the Data Analytics Internship undertaken from 04 August 2026 to 18 August 2026. These documents are reproduced below as Fig. 3.1, Fig. 3.2, and Fig. 3.3 respectively. The certificate of selection issued by Internshala at the commencement of the internship (Fig. 3.4) is also included as further evidence of the researcher's enrolment in the programme.

### Letter of Recommendation

To Whom It May Concern,

It is my privilege to provide this letter of recommendation for **Kshitij Yadav**. As the Founder and CEO of InAmigos Foundation, I have had the opportunity to work with numerous professionals, and it is clear that **Kshitij Yadav** stands out as a highly competent and dedicated professional.

During the tenure at InAmigos Foundation, exceptional contributions were made, consistently surpassing targets and completing assigned tasks with remarkable efficiency. From the very first day, the ability to communicate effectively and deliver results was evident. Over time, a proactive approach, combined with hard work and dedication, led to continuous improvement in skills and overall performance, exceeding expectations.

Beyond technical expertise, a strong sense of responsibility, adherence to deadlines, and a collaborative mindset were demonstrated throughout the internship. A positive attitude and the ability to work seamlessly with teams ensured that all tasks were completed successfully, benefiting the organization significantly.

It is with full confidence that I recommend **Kshitij Yadav** for future opportunities. The professionalism, reliability, and problem-solving capabilities displayed during the internship make **Kshitij Yadav**.

Should further information be required, please do not hesitate to contact me.

Sincerely,

Authorized Signatory  
Name: Mr. Govind Shukla  
Designation: Founder & CEO

## **4. PROJECT DESCRIPTION**

### **4.1 Introduction**

This report documents the internship undertaken by Kshitij Yadav, a Second-year (third semester) B.Tech Computer Science and Engineering (AI & ML) student at IILM University, Greater Noida, with InAmigos Foundation (IAF), a non-profit organisation. The internship was undertaken in the Data Analyst / Data Analytics role and was structured around a series of research-driven, data-oriented assignments requiring the collection, organisation, verification, and analysis of information from publicly available and AI-assisted sources.

As per the offer letter dated 1 August 2026, the internship was structured as a flexible, primarily remote engagement, originally scheduled for a two-week period. Task-based assignments were completed and formally documented between 5 August 2026 and 17 August 2026. This report consolidates the objectives, methodology, tools, and outcomes of the work carried out during this period, and presents the deliverables produced as part of the internship.

### **4.2 Organization Profile**

InAmigos Foundation (IAF) is a non-profit, Section 8 organisation registered in India, holding 80G and 12A tax-exemption certification, CSR-1 registration, and ISO 9001:2015 certification, and is listed on the NGO Darpan portal of NITI Aayog. Operating under the tagline “Uniting Minds for Change,” the foundation runs a range of social-impact initiatives spanning education, community welfare, and volunteer-driven outreach programmes, including named initiatives such as Bachpanshala, Udaan, and Jeevan.

The foundation maintains an active digital presence across multiple platforms, including Instagram (over 33,000 followers), YouTube (over 25,000 subscribers across 70+ videos), and X/Twitter (over 6,600 followers), which it uses to document its programmes, publicise partnerships (such as its collaboration with Pratham Education Foundation), and engage student interns and volunteers. Within this internship, the researcher's assigned role was that of a Data Analyst / AI Data Analyst Intern, working on secondary research, structured data compilation, and AI-assisted analysis in support of the foundation's ongoing NGO-sector mapping and knowledge-building efforts.

### **4.3 Problem Statement**

Small and growing non-profit organisations such as InAmigos Foundation frequently lack a centralised, verified body of reference information on other NGOs operating in the same sector, on external opportunities relevant to student volunteers and interns, and on transferable growth strategies used successfully elsewhere in the social sector. At the same time, the increasing availability of AI tools for research and content generation introduces a parallel challenge: information produced with AI assistance must still be independently verified against reliable primary and secondary sources before it can be considered trustworthy. The internship was designed to address both problems together — building verified reference resources for the foundation while developing the intern's ability to use AI tools responsibly, rather than accepting AI-generated output at face value.

### **4.4 Project Objectives**

- To research, verify, and document a structured profile of genuine, currently active education-focused NGOs operating in the Delhi NCR region.
- To investigate and report on a social-impact topic (the use of AI/ML in Indian healthcare) using AI-assisted research combined with independent verification.
- To compile and verify a database of technology, research, and volunteering opportunities available to Indian students.
- To translate successful, real-world NGO growth practices into actionable strategies that a small or growing NGO could realistically apply.
- To develop and demonstrate responsible use of AI tools for research — cross-checking AI-generated claims against original and reliable sources rather than accepting them uncritically.
- To document and communicate completed work professionally through structured reports and public/professional channels such as LinkedIn.

### **4.5 Scope of the Project**

The scope of the internship covered four principal task-based assignments — NGO research and data collection, an AI-assisted social-impact analysis report, a volunteer/opportunity data-compilation exercise, and an AI-insights report on NGO growth strategies — along with an optional secondary responsibility of contributing to the foundation's fundraising efforts and expanding its social-media reach. The work

was limited to secondary (desk-based) research; no field visits, interviews, or primary data collection were undertaken. All findings reflect information that was publicly available at the time each assignment was completed.

#### **4.6 Technologies and Tools Used**

- Microsoft Word and Microsoft Excel for structured report and dataset preparation
- AI-assisted research and drafting tools, used for first-pass information gathering and analysis, with all AI-generated claims independently cross-checked
- Web-based secondary research across official organisational websites, nonprofit directories (e.g., Give.do, CSRBOX), Wikipedia, and credible news/feature coverage
- LinkedIn, Instagram, YouTube, and X (Twitter) for professional documentation and organisational outreach/verification
- UPI-based digital payment tools, used in connection with the internship's optional fundraising component

#### **4.7 System Architecture / Work Process**

As this internship was research- and analysis-oriented rather than software-development-oriented, its “architecture” took the form of a repeatable research-and-verification workflow applied consistently across all four tasks:

- Task Briefing — understanding the assignment scope and deliverable format shared by InAmigos Foundation.
- Source Identification — identifying credible primary sources (official websites, government portals) and secondary sources (directories, news, Wikipedia) relevant to the task.
- AI-Assisted Drafting — using AI tools to accelerate first-pass research, summarisation, and structuring of findings.
- Verification — cross-checking every AI-assisted claim against the original source before including it in the final deliverable; data points that could not be verified were explicitly marked rather than estimated.
- Compilation — structuring verified findings into a formatted report or spreadsheet (Word/Excel/PDF) meeting the task's documentation standard.

- Submission and Documentation — submitting the completed deliverable to InAmigos Foundation and publishing a summary of the completed task on LinkedIn for professional documentation.

#### **4.8 Methodology**

The methodology applied across all assignments was secondary, verification-driven research. For the NGO mapping assignment (Task 1), ten education-focused NGOs headquartered in or serving the Delhi NCR region were identified and profiled using official websites as the primary source, cross-checked against Wikipedia, nonprofit directories, and credible feature articles; where a data point could not be confirmed, it was marked “Information Not Publicly Available” rather than estimated. For the AI-in-healthcare assignment (Task 2), published statistics from sources such as the ICMR National Cancer Registry Programme and Rural Health Statistics were used to frame documented, human-supervised AI/ML pilots in Indian healthcare (including TB screening, diabetic retinopathy screening, and cervical cytology). For the opportunities-compilation assignment (Task 3), each of the identified opportunities was verified against its official application portal, with eligibility, deadlines, and status independently confirmed rather than copied from secondary listings. For the NGO growth-strategy assignment (Task 4), each recommended strategy was grounded in a documented, real-world NGO example (such as Robin Hood Army and Goonj) rather than presented as a generic or unattributed suggestion.

Across all four tasks, a consistent principle was applied: AI-generated first drafts were treated as a research starting point, not a finished, trustworthy output, and every substantive claim was checked against an original or reliable source before being finalised.

#### **4.9 Expected Outcomes**

By the conclusion of the documented internship period, the following outcomes were achieved:

- A verified, structured 18-page reference report profiling ten education-focused NGOs in Delhi NCR, intended to support InAmigos Foundation's ongoing NGO-mapping efforts.
- A concise AI-assisted analytical report examining the real-world use and social impact of AI/ML in Indian healthcare access and early detection.

- A verified spreadsheet compiling 19 technology, research, government, and volunteering opportunities available to Indian students, including eligibility and first-year suitability notes.
- A five-strategy report translating documented NGO growth practices into actionable recommendations for small or growing NGOs.
- Demonstrated, practical experience in using AI tools responsibly for research — verifying rather than assuming the accuracy of AI-generated content.
- Professional documentation of all completed tasks through LinkedIn posts, contributing to a visible record of the internship on the researcher's professional profile.

As an optional secondary responsibility outlined in the offer letter, the researcher also contributed to the foundation's fundraising initiative and to expanding its social-media following across Instagram, YouTube, X (Twitter), and LinkedIn; completion of these optional activities was not a requirement for the internship completion certificate.

#### 4.10 Certificates of Completion and Other Communication / Proof

The screenshots below document the signed offer letter, task-completion posts, and other communication serving as proof of participation and engagement during the internship.

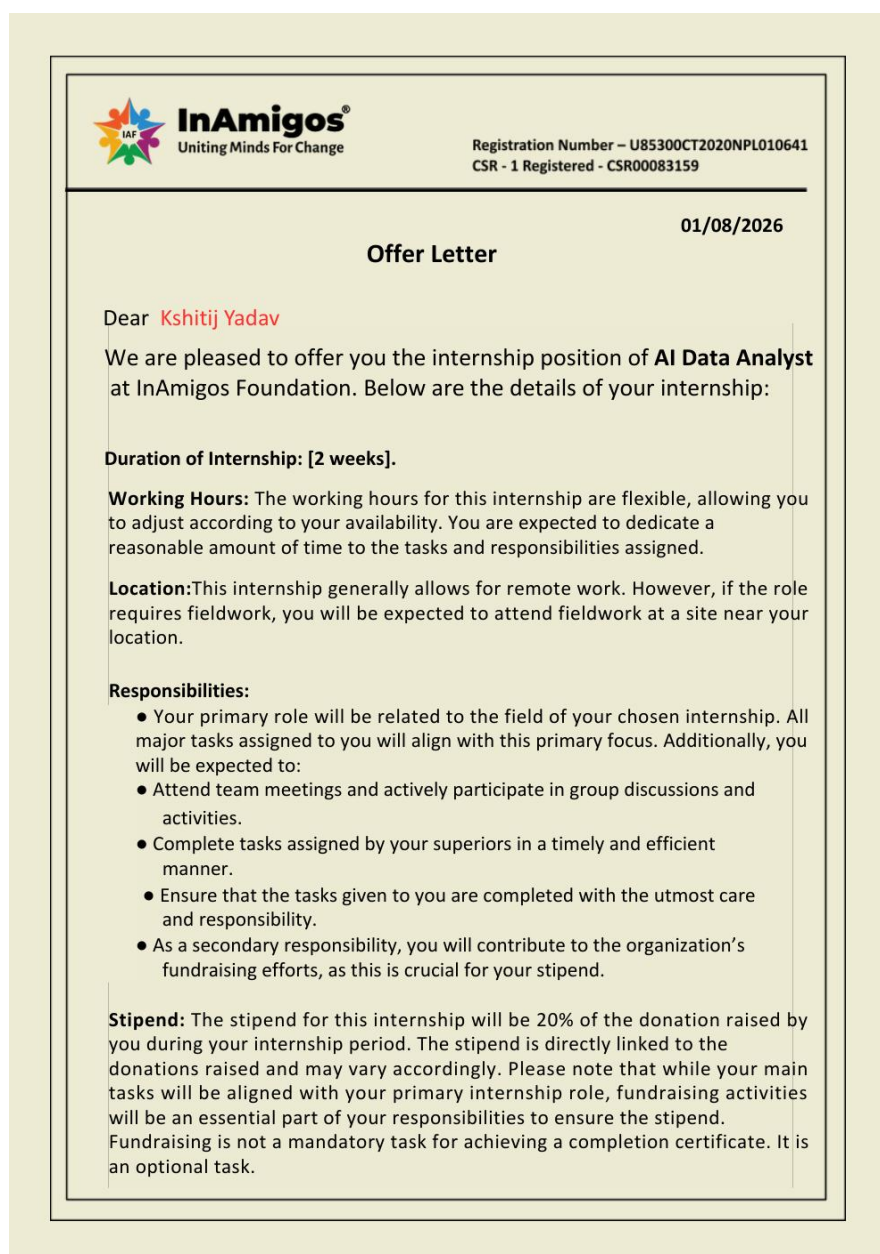

Fig. 4.10.1 — Signed internship offer letter (InAmigos Foundation), page 1 of 2

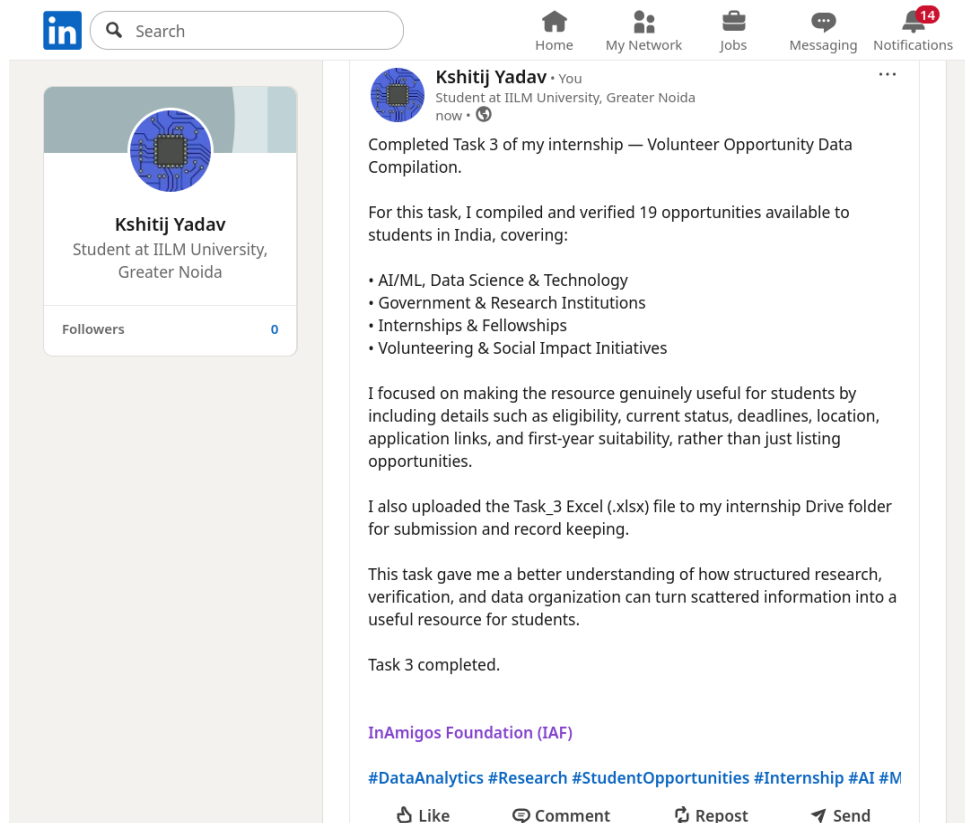

Fig. 4.10.4 — LinkedIn post documenting completion of Task 3 (Volunteer & Opportunity Data Compilation)

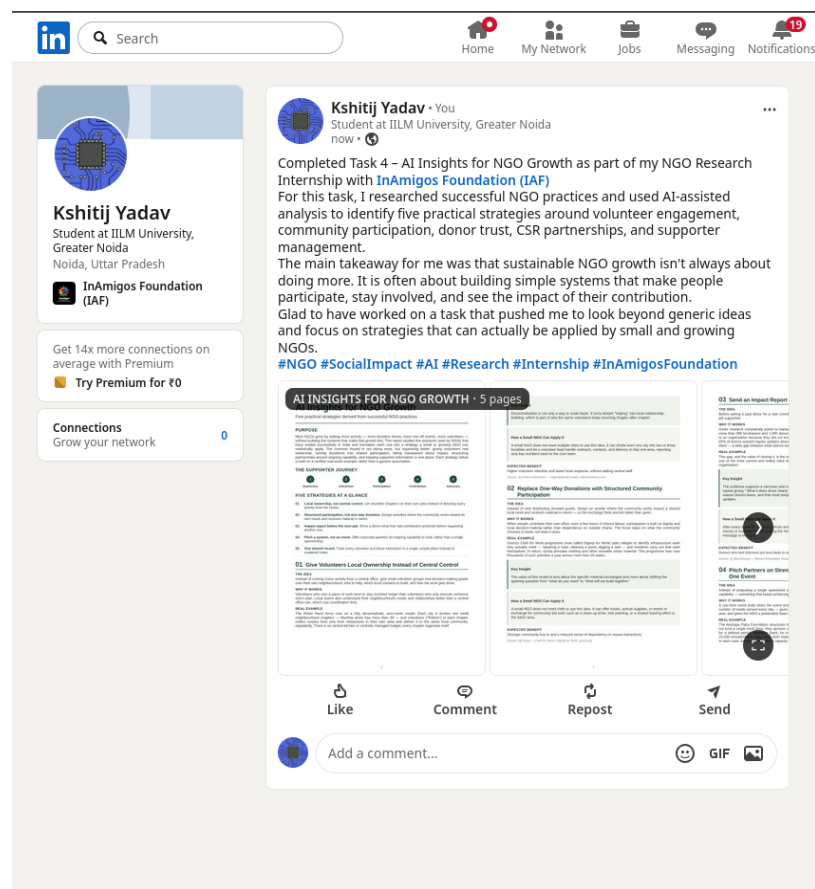

Fig. 4.10.5 — LinkedIn post documenting completion of Task 4 (AI Insights for NGO Growth)

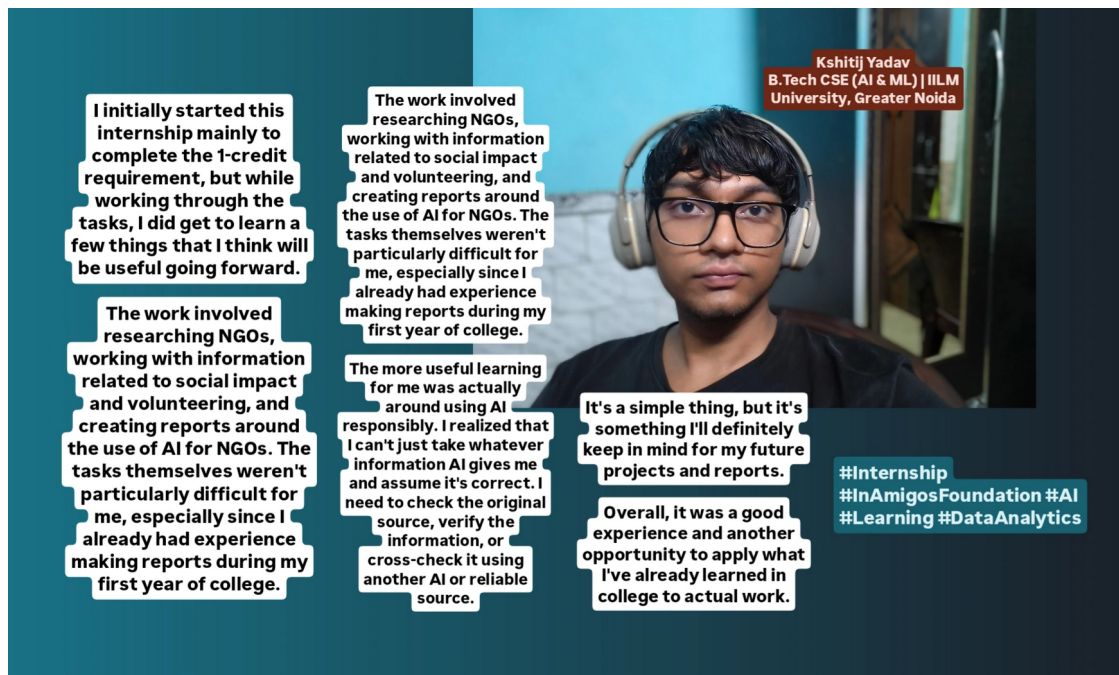

Fig. 4.10.6 — Written internship reflection / testimonial

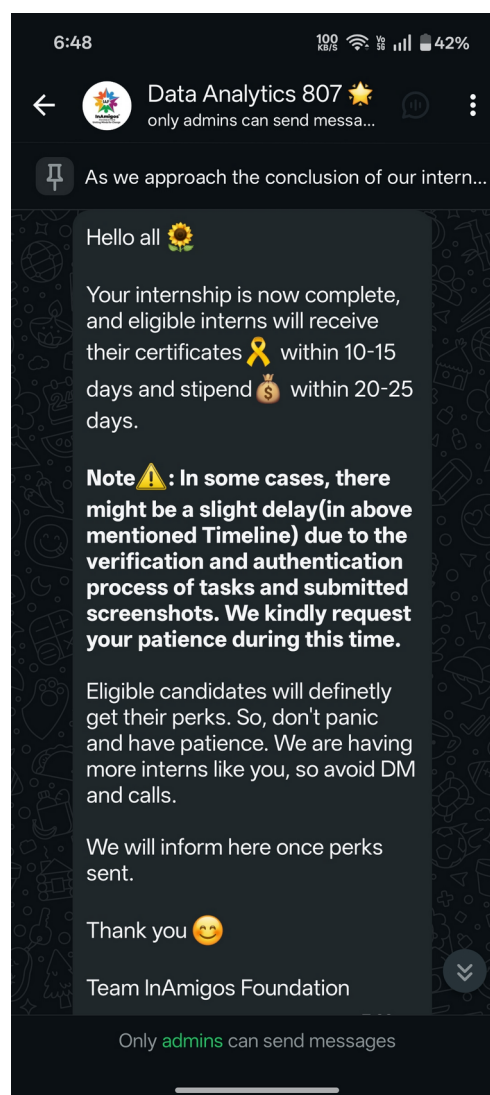

Fig. 4.10.7 — Organisation review submitted on completion of the internship

The following additional screenshots, captured directly from the researcher's communication with InAmigos Foundation, further evidence the completion of the internship, the researcher's contribution to the optional fundraising activity, and the researcher's conduct during the engagement.

### Points of Contact for Verification

For verification of the internship and the researcher's participation, the following InAmigos Foundation representatives may be contacted: Aishanya Rathore (+91 72690 11657) and Nakul Reddy Vutkuri (+91 93923 12706).
